Project 2 (Exam 2) – Sales App

Description: Project 2 consists of creating a sales page. The purpose of project 2 is to use the knowledge of colors, image manipulation, animation, modal window, and slideshow to create a simple sales page.

Procedure:

1. Create a folder and name it as *Project2_LastName*
2. Open Paint and create a simple logo for your sales app. Once you finish with your logo, save it in *img* folder within the *Project2_LastName* folder. Save the logo as *logo.png*

3. Open Atom, create two files, and save them as *index.html* and *index.css*. Remember to save the files in your project folder *Project2_LastName*
4. In the html file, set up the html structure. Don't forget to include the meta tag and link the css file.
   ```
   <meta name="viewport" content="width=device-width, initial-scale=1">
   <link rel="stylesheet" href="index.css" type="text/css">
   ```
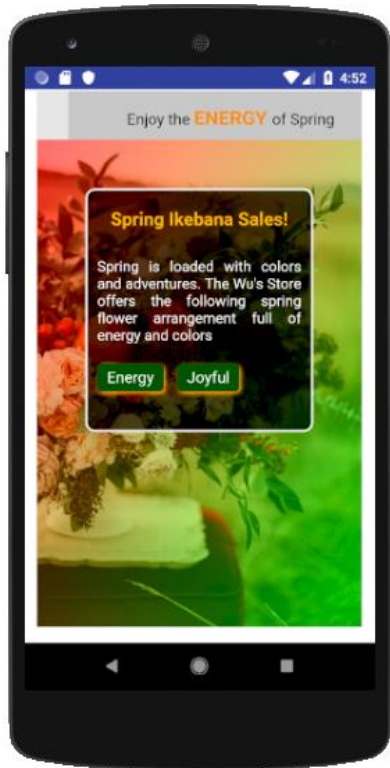

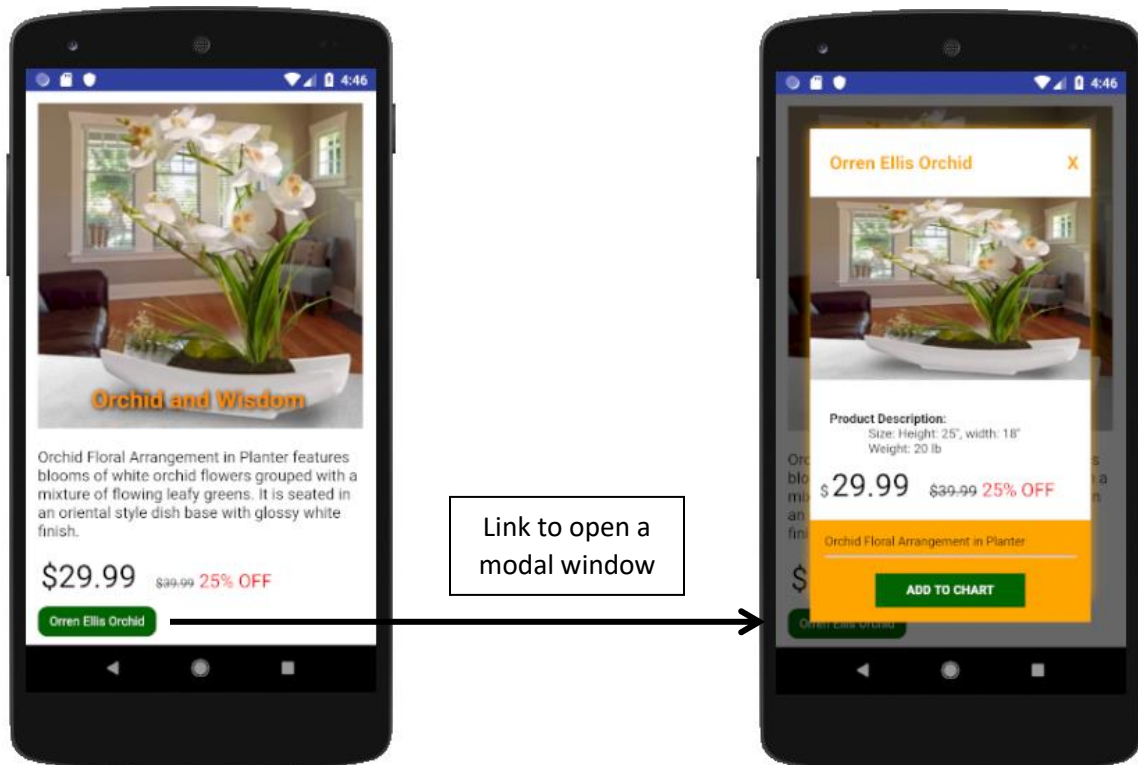

Your app should have:

- Custom logo

- One slideshow with five slides, delay between slides, and backward to the beginning of the slides. The slideshow could be of only text, images, or both.
- One hero image with two linear-gradient colors, and a text message in front of it. The text message should have border, border-radius, title and paragraph with different colors, and two hyperlinks link within the same web app.
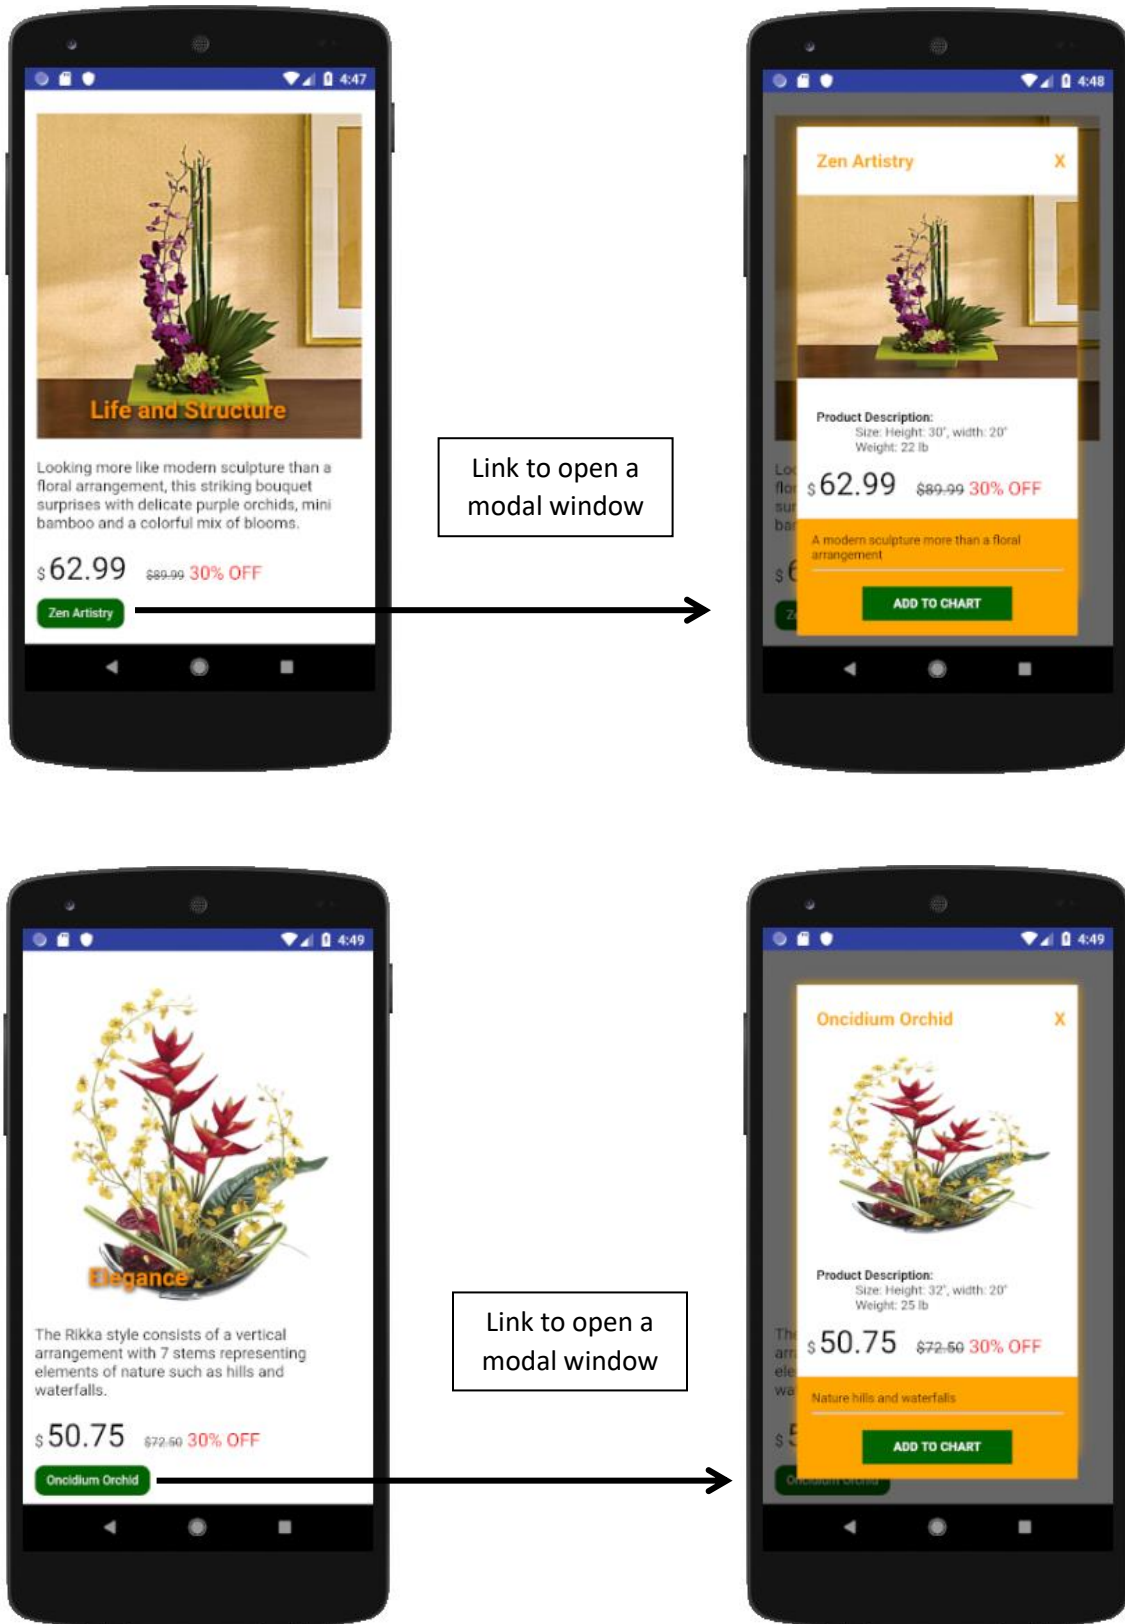

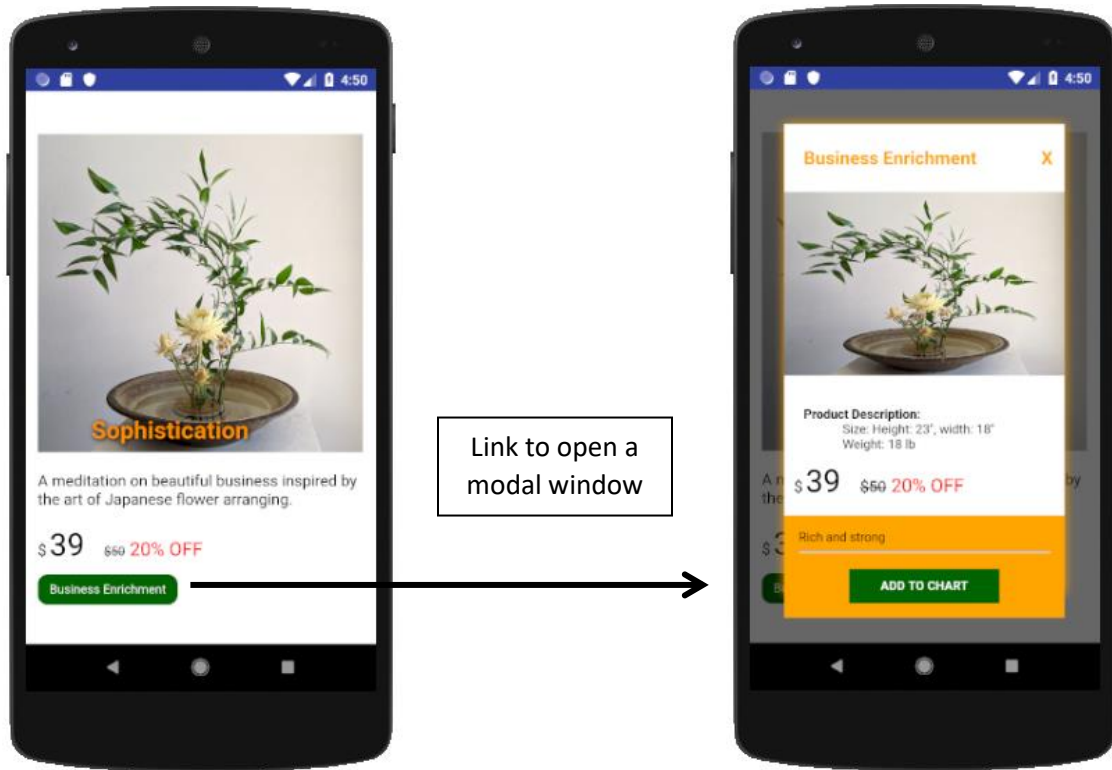

- Present at least four product. Each product should have an image with text message in front of it, information paragraph, price, and a hyperlink. The hyprlink will open a modal window.

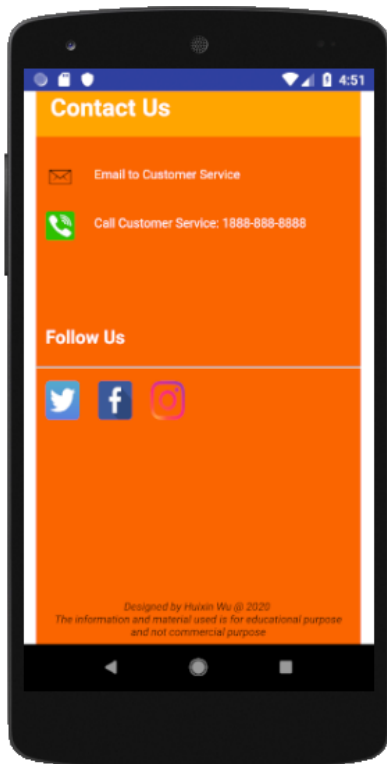

Link to open a modal window

- Each modal window should have a box-shadow, title, close symbol "X", an image, a description paragraph, a footer section with ADD TO CHART link.

The other three product should have the same style as the first image
